

MKX-Tend

Retracting Swing Auger

Once a grain trailer is in position, the swing tube is extended. The power swing moves the low profile hopper side-to-side, reaching the truck hoppers with ease. The X-Tend then retracts to allow grain trailers to drive away.

Westfield's retracting swing auger offers the convenience of being able to extend, swing side-to-side and retract, without having to move or reposition the truck. The X-Tend was designed to work with the MKX 130. It's fast and convenient!

X-Tend Hopper Features

- Low profile hopper positions under grain trailers with ease
- Hydraulic power swing with large lug tires, allow for precise positioning and maximum traction
- Dual flighting channels grain flow into the swing tube matching the capacity of your MKX 130 auger

X-TEND SPECIFICATIONS

	MKX 130 X-TEND
Stroke	9'
Working Retraction	20"
Main Flight Thickness	0.25"
Core Diameter	2.375" OD
Main Tube Thickness	12 GA
Transition Flight Thickness	0.25"
Tube Length	17'
Hydraulic Controls	3-way, mounted on swing tube
Power Extend	Yes
Mechanical Drive	Yes

WESTFIELD is an AGI Brand.
